TIA SUKHNANNI

Jaipur, Rajasthan, India tiasukhnannis@gmail.com 7240017609 in/tia-sukhnanni-a4bb28308 tiasukhnanni.online

SUMMARY

Full-stack developer with hands-on experience building and shipping real-world web and mobile applications using MERN stack. Delivered production- level backend features and frontend revisions across agri-tech, healthcare, and content platforms, with a focus on RESTful API design, database architecture, and end-to-end feature delivery.

PROJECT

Kisan Saathi - AI-Powered Farmer Companion App

Express.js | TFLite | GenAI (Groq API) • github.com/NamNam9252/Farmer • March 2026 - March 2026

- **Designed the backend architecture** for a full-stack agricultural platform, building secure **Express.js REST APIs** to manage market data, scheme directories, and user profiles.
- **Built and deployed an automated crop diagnostic tool** by bridging on-device **TFLite** models with cloud-based AI (**Groq**) for instant, photo-based disease analysis.

CarePlus - Full-Stack Healthcare Platform

Node.js | Express.js | MongoDB | Socket.IO • careplus-tau.vercel.app • January 2026 - February 2026

- **Engineered the backend architecture** from the ground up, building secure **RESTful APIs**, optimizing database schemas, and writing server logic for a full-scale healthcare platform.
- **Developed core patient-doctor workflows**, including robust routing for virtual consultation scheduling, persistent user sessions, and automated appointment booking.
- **Integrated real-time data synchronization** to power live clinic queue management, dramatically improving the efficiency of digital patient handling.

TiaSumé - AI-Powered Resume Builder

React | Node.js | MistralAI • tiasume.vercel.app/ • November 2025 - January 2026

- **Engineered a fast, web-based resume generation tool**, optimizing the user flow by utilizing local session management to bypass traditional authentication for instant access.
- **Architected an AI integration pipeline** utilizing the **MistralAI API** to deliver dynamic, on-the-fly text generation, helping users optimize their professional summaries.
- **Implemented robust client-side PDF rendering**, ensuring high-fidelity document exports directly from the user's browser.

SKILLS

Frameworks & Libraries: React, Next.js, Express.js, Tailwind CSS, Socket.IO

Database: MongoDB, PostgreSQL, MySQL

Languages : C, Python, Javascript, Typescript(basics)

AWARDS & HONORS

1st Runner Up – HackJKLU Pre-Hackathon 2026 (24-Hour Hackathon)

JK Lakshmipat University,Jaipur • 2026

- Secured runner-up position among 60+ multiple teams by building a working prototype.
- Worked as a backend developer in this particular project.

CERTIFICATIONS

IBM Data Science Professional Certificate

Coursera • 2025

- Built and evaluated predictive models using real-world datasets, applied statistical concepts.
- https://www.coursera.org/account/accomplishments/professional-cert/IOZP6V5UG1I9

EXPERIENCE

Hackathon Participant

LNMIIT **January 2026 - January 2026, Jaipur**

- Developed a decentralized Web3 web application under rigorous time constraints during a fast-paced hackathon environment.
- Acquired practical expertise in Web3 architecture, including the integration and deployment of blockchain smart contracts.

EDUCATION

B.Tech in Computer Science and Artificial Intelligence

JK Lakshmipat University (JKLU) • Jaipur • 8.826/10
