SUMMARY

Computer Science undergraduate graduating in 2028 with hands-on experience building and deploying full-stack and backend applications. Strong foundation in Python, data structures and algorithms, object-oriented programming, REST APIs, SQL, and databases, with experience designing production-oriented software systems across healthcare, agriculture, and education.

EXPERIENCE

Summer Intern- LUSIP 2026

The LNM Institute of Information Technology (LNMIIT)

June 2026 - July 2026, Jaipur

- Developed a **Resume Transformation Tool** that extracts and converts resume content from PDF documents into structured, machine-readable data.
- Implemented **NLP and OCR-based document processing** using Python, spaCy, PyMuPDF, and Tesseract to handle both digital and scanned resumes.
- Built a **Flask-based web application** for resume upload, automated processing, and generation of structured PDF reports.

PROJECTS

Kisan Saathi - AI-Powered Farmer Companion App

Express.js | TFLite | GenAI (Groq API) • github.com/NamNam9252/Farmer • March 2026 - March 2026

- Designed the backend architecture for a full-stack agricultural platform, building secure Express.js REST APIs to manage market data, scheme directories, and user profiles.
- Built and deployed an automated crop diagnostic tool by bridging on-device TFLite models with cloud-based AI (Groq) for instant, photo-based disease analysis.

CarePlus - Full-Stack Healthcare Platform

Node.js | Express.js | MongoDB | Socket.IO • careplus-tau.vercel.app • January 2026 - February 2026

- Engineered the backend architecture from the ground up, building secure RESTful APIs, optimizing database schemas, and writing server logic for a full-scale healthcare platform.
- Developed core patient-doctor workflows, including robust routing for virtual consultation scheduling, persistent user sessions, and automated appointment booking.

TiaSumé - AI-Powered Resume Builder

React | Node.js | MistralAI • tiasume.vercel.app/ • October 2025 - November 2025

- Engineered a fast, web-based resume generation tool, optimizing the user flow by utilizing local session management to bypass traditional authentication for instant access.
- Architected an AI integration pipeline utilizing the MistralAI API to deliver dynamic, on-the-fly text generation, helping users optimize their professional summaries.
- Implemented robust client-side PDF rendering, ensuring high-fidelity document exports directly from the user's browser.

EDUCATION

B.Tech in Computer Science and Artificial Intelligence

JK Lakshmipat University (JKLU) • Jaipur • 9.049/10

Visiting Scholar

Indian Institute of Technology Jammu (IIT Jammu) • Jammu, Jammu & Kashmir, India • 2026

CERTIFICATION

IBM Data Science Professional Certificate

Coursera • 2025

- Link- <https://coursera.org/share/91783b33ef6f9e6bc526fe09933207c2>

AWARDS & HONORS

1st Runner Up – HackJKLU Pre-Hackathon 2026 (24-Hour Hackathon)

JK Lakshmipat University, Jaipur • 2026

- Secured runner-up position among 60+ multiple teams by building a working prototype.
- Worked as a backend developer in this particular project.

SKILLS

Languages: Python, C, JavaScript

Web and Databases: HTML, CSS, React, Next.js, Express.js, SQL, MongoDB, PostgreSQL

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Algorithms & Complexity, Problem Solving
